

CLOPAY COMMERCIAL

pass door

 Clopay®

A pedestrian pass door is ideal for applications where a standard entry door cannot be installed because of space limitations. It helps save on heating and cooling costs by reducing the number of times the main overhead door needs to be opened and closed.

FEATURES AND BENEFITS

- 1** Aluminum frame with shiplap design adds to strength and durability, along with a weather-resistant seal. Rain cap helps to protect against water accumulation.
- 2** Geared hinge provides smooth operation and enhanced longevity of the door.
- 3** Continuous 2" × 3" aluminum boxed channel bottom rail allows for additional strength.
- 4** Commercial door closer is adjustable for right or left hinge door and allows for smooth and quiet closure.
